DATA SHEET
Heavy-Duty LED Dock Light
L41LED

THE BEACON LIGHT

LED Dock Light L41LED

The L41LED uses only a fraction of the energy of a quartz halogen or incandescent light while providing a bright, uniform light to fully illuminate even the longest of trailers.

The light gives off almost no heat, meaning a much safer light with little or no maintenance. Heavy duty enough to withstand the rugged environment of a typical loading dock area, the L41LED has what it takes to ensure you can get your job done safely and efficiently.

KEY FEATURES

- *As bright as a 500W quartz halogen*
- *Low energy usage*
- *No bulb replacement required.*
- *AC & DC voltages available.*
- *Instant start-up, at full output, even in cold temperatures.*
- *Cool to the touch, even if left running for extended lengths of time.*
- *Durable cast aluminum housing and polycarbonate lens*
- *60" extension arm with 5 pivot points.*

SPECIFICATIONS	
VOLTAGE	90-277V
WATTAGE	34W
LIGHT TEMPERATURE	5,700K (white light)
LUMENS	3,500
LIGHT EXPECTANCY	50,000 hours of 24/7 use
CONSTRUCTION	Aluminum fixture, tubular steel arm, shatter resistant glass lens with protective cage, 60 inch dock arm
WEIGHT	10lbs
APPROVALS	cULus
