

# HEAVY DUTY LED DOCK LIGHT

## KEY FEATURES

- 40" extension arm with 5 pivot points.
- No bulb replacement required.
- Cool to the touch, even if left running for extended lengths of time. Rated for outdoor use.
- Low energy usage.
- Instant start-up, at full output, even in cold temperatures.
- Durable cast aluminum housing.
- Yellow powder-coat finish for maximum visibility.

You won't believe how much you can save by replacing your traditional dock lights with the L41LED. By utilizing the latest advancements in LED technology, the L41LED uses only a fraction of the energy of a quartz halogen or incandescent light while providing a bright, uniform light to fully illuminate even the longest of trailers. The light gives off almost no heat, meaning a much safer light with little or no maintenance. Heavy duty enough to withstand the rugged environment of a typical loading dock area, the L41LED has what it takes to ensure you can get your job done safely and efficiently.

## KEY BENEFITS

- Safer working environment.
- Lower total cost of ownership.
- Reduced downtime on loading docks.
- Energy saving device for a greener footprint.
