WELDING RACK DATASHEET

Lind Equipment's portable **Welding Rack** is a versatile and efficient solution designed to mobilize your welding operations. This rack accommodates up to four (4) welders, and can be physically linked to a second unit to make an eight (8) unit rack assembly.

Features

- Physically linkable with electrical feed-thru.
- Forklift/telehandler pockets.
- Hoisting eyelets.
- Heavy-duty swivel casters.
- Transformer & 120V GFCI utility receptacles.
- NEMA 3R weatherproof enclosure.

Benefits

- Multiple input options: Hard wire, camlock, pin & sleeve, etc.
- Mount up to 4 welding machines per rack.
- Fits through a standard doorway.
- Accommodates most common Miller and Lincoln models.
- Custom powder coat colours (optional).
- Plasma etched company logo in frame (optional).

OVERVIEW	
Part Number	LE-4WR480FT-200
Description	200A 4-Pack Welding Rack
Input	200A 480V
Feed-Thru	100A 480V
Input/Feed-Thru Options	- Hardwire (default) - 4W camlock (add CL4 to the part #)
Primary Voltage (480V)	4 x 30A 480V TL (L16-30R)
Transformer	9KVA delta to 120/208V wye
Secondary Voltage (120/208V)	4 x 20A 125V GFCI duplex (5-20R)
Weight	600lbs (without welders)
Construction	Heavy-gauge powder coated steel
Approvals	Approved to UL & CSA Standards **Meeting OSHA, MOL/WorkSafe, NEC and CEC regulations.*
Dimensions	40" L x 31.75" W x 80" H
