

# THE BEACON LIGHT

## KEY FEATURES

- Same amount of useable light of a 400W metal halide.
- Low energy usage.
- No bulb replacements.
- IP65 weatherproof rated.
- Instant start-up, at full output, even in cold temperatures.
- Cool to the touch, even if left running for extended periods of time.
- Durable cast aluminum housing with powder-coat yellow paint.
- Available on tripod, floor stand or light head only.

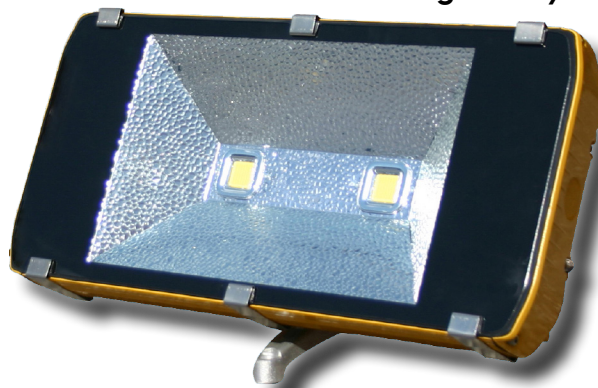

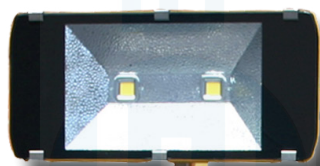

*The Beacon Light is the only portable LED floodlight on the market that is built strong enough to withstand the toughest environments without compromising on high-quality light output. The 140W Beacon Light projects a wide, shadow-free flood of crisp bright white light generated via 2 x 70W integrated chips, which are solid-state and can therefore endure shocks, vibrations and rough handling without breaking the LEDs. The high-quality LEDs are cool running and rated for over 50,000 hours, meaning you never have to change a bulb. The Beacon will provide an instant start in even the coldest locations, and the unit remains cool-to-the-touch even if left running for days.*

## KEY BENEFITS

- Safer working environment.
- Lower total cost of ownership.
- Reduced downtime on job sites.
- Energy saving device for a greener footprint.
- Extremely versatile light for multiple applications.
- Cost-effective alternative to traditional tower lights.

## INDUSTRIES

- Mining
- Construction
- Utilities
- Road work
- Shipping yards
